

Novelis Bay Minette

Novelis is driven by its purpose of shaping a sustainable world together. We are a global leader in the production of innovative aluminum products and solutions and the world's largest recycler of aluminum. The leading aluminum solutions provider, Novelis is building a low-carbon, fully integrated aluminum recycling and rolling plant in Bay Minette, Alabama. The first of its kind in more than 40 years, the facility will support the growing demand for sustainable aluminum solutions for beverage can sheet and automotive production in North America. This investment underscores Novelis' commitment to innovation, decarbonization, and long-term partnership with customers and communities across the region.

Designed from the ground up to set new standards in innovation, safety, aluminum production, and environmental stewardship, Bay Minette will serve as a cornerstone of Novelis' operations and a blueprint for what's possible when it comes to leading the industry. This plant will expand capacity, support the beverage packaging and automotive markets, and drive long-term value for Novelis' people, partners, and the planet. This is history in the making.

Facts and Figures

Investment

\$5B – the largest economic investment in the state of Alabama's history

Workforce

Up to 1,000 jobs

Timeline

Commissioning expected in the second half of 2026

All long-term customer agreements have been secured

Capacity

600kt of finished aluminum goods capacity for the beverage packaging and automotive markets

Inputs

The plant will take in 17 billion used beverage cans annually

Novelis Bay Minette is 2.8M sq. ft. under roof, which equates to:

1,000 Tennis Courts

10 Eiffel Towers' worth of steel

15 USS Gerald R. Fords
