

# Novelis HOKOTOL®

The alloy with a high grade of hardness for best possible polishability

## Customized Aluminum Solutions for Aerospace and Industrial Plate

With more than 55 years of experience and know-how, we serve a variety of end-use industries, and are among the world's leading suppliers of high-quality aluminum rolled products. Novelis is helping our customers meet regional demand through two certified plants in Koblenz, Germany and Zhenjiang, China; and we believe that it's a win-win situation for all parties when we bring our customers further.

### Hardness

HOKOTOL® has been developed to ensure a high grade of hardness across the entire plate thickness. This is an advantage when surfaces have to be polished or machined away. Polished surfaces are often used in translucent elements like headlamps, spotlights or lamp housings.

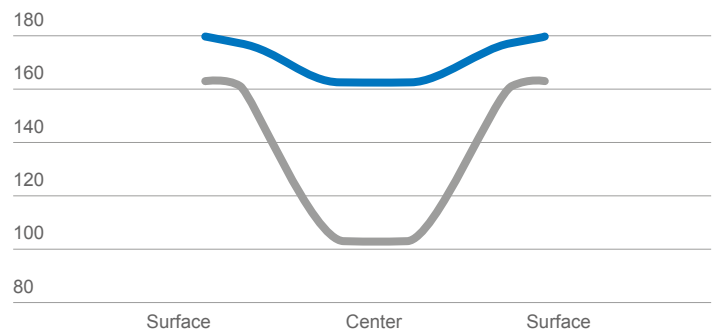

### Characteristics

- Consistent hardness across the entire thickness
- Good grinding & polishability for surface critical components / optical surfaces
- Very good thermal conductivity
- Extremely uniform mechanical properties across the entire thickness
- High dimensional stability due to low residual stress
- Excellent machinability

### Hardness across plate thickness

Hardness HB [2.5/187.5]
